

TECHNICAL DATA SHEET

ART. 471G

DIMENSION

Grande

DESCRIPTION:

Stopper for Sliding Gates - Big Type

FINISHING:

Galvanized Steel

CATEGORY:

Sliding gates

MATERIAL:

Body: Steel (C/40S)

Bumper: Rubber

Stopper for Sliding Gate, Big model.

Suitable to be welded.

The performances are intended for products correctly positioned, fixed, aligned and maintained in relation to the use, the positioning and the environmental conditions. The following factors can affect very much durability, performances and safety:

- The positioning and the alignment on an adequate support
- The correct mounting (screwing or welding) and regulation
- The regular lubrication, cleaning and maintenance (avoiding dirt, dust, rust, etc...)

I.B.F.M. suggest normal scheduled inspection, cleaning and maintenance of the products or eventually their substitution if damaged.

All the declared characteristics and performances refer to a product correctly installed by qualified personnel and regularly inspected, maintained and lubricated. I.B.F.M. declines any liability for even partial modifications to the product.

The company I.B.F.M. hereby declares that the above items are produced in Italy in conformity with the existing norms in force.

All pictures, technical drawings and related specifications are exclusive property of I.B.F.M. and they are defended by laws of copyright. Without the written agreement of I.B.F.M., all uses and reproductions will be legally prosecuted. I.B.F.M. reserve the right to make changes without notice and independently on product specifications and characteristics.
